

Label automatic Endfold, Mitrefold, Centrefold, Lengthfold and Straight cut machin

This machine equip variable voltage and variable frequency, high-end motor, running stable, operate it easy, superior performance. Because of unique Flat holding shift mark technology, it can solve the problem whicj iis hard to cut soft label and greatly improve the qualified rate of products. It adopt imported heating tube and electronic temperature contorlsystem,heatng faster, constancy of temperature. It adopt import alloy cutter and it can be used for long time. It adopt one step forming technology , imported electric eye color separation device, position, folding faster, good effect. It is preferred deviceof label printing machine , garment label folding machine and single cutter.
